

How can you
simply expand
your soft-tissue
treatment options?

Exactly.

Geistlich Mucograft®

Available sizes

- > 15x20 mm
- > 20x30 mm
- > Geistlich Mucograft® Seal, 8 mm

Studies

Geistlich Mucograft® has been clinically evaluated for augmentation of keratinized mucosa:

- > Around natural teeth^{1,2}
- > Around implants or fixed prosthetic restorations^{3,4}
- > Prior to implant placement⁵
- > In vestibuloplasties with long-term follow-up^{6,7}
- > As a socket seal after ridge preservation⁸
- In open-healing situations, Geistlich Mucograft® is a predictable alternative to free gingival grafts.^{2,3,4,6}

Geistlich Mucograft® has also been clinically evaluated for recession defects:

- > In single sites with a coronally advanced flap⁹⁻¹²
- > In multiple sites with a coronally advanced flap¹³⁻¹⁷

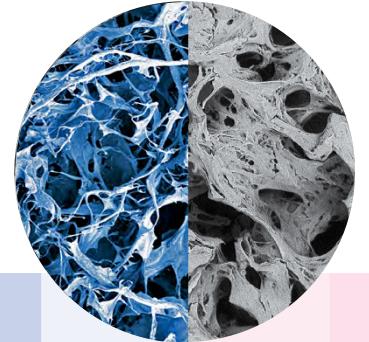

When used in a submerged situation Geistlich Mucograft® is a predictable alternative to connective tissue grafts.^{10,13}

To meet your demands for additional soft-tissue treatment options, Geistlich's dedicated team of collagen experts went to work to develop solutions. The result is a choice – Geistlich Fibro-Gide® and Geistlich Mucograft® each offer unique benefits, allowing you to select the right matrix for your specific clinical needs.

The Ideal Matrix for the Gain of Keratinized Tissue

Compact and spongy layer

Structure

Reconstituted collagen – no cross-linking

Reduced volume stability

Open and submerged healing

- Gain of keratinized tissue
- Socket Seal
- Vestibuloplasty
- Recession Coverage

The Right Solution for Volume Stability

Porous layer

Cross-linking

Reconstituted collagen – smart cross-linking

Stability

Good volume stability

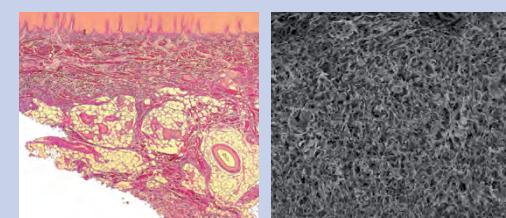

Healing

Submerged healing

Indications

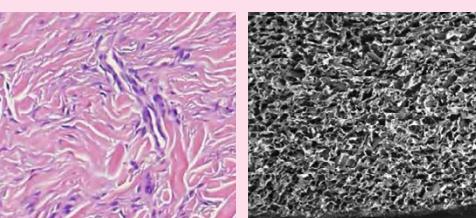

- Soft-tissue volume augmentation around implants and natural teeth, and under pontics
- Recession Coverage

Geistlich Fibro-Gide®

Available sizes

- > 15x20x6 mm
- > 20x40x6 mm Coming Soon

Studies

Clinical studies in the following indications have shown positive results:

- > Soft-tissue augmentation around implants after staged Guided Bone Regeneration^{1,2}
- > Soft-tissue augmentation around implants in conjunction with Guided Bone Regeneration³

Geistlich Fibro-Gide® is a valuable alternative to autologous connective tissue grafts.^{1,2,4}

CAUTION: Federal law restricts these devices to sale by or on the order of a dentist or physician.

Indications:

Geistlich Fibro-Gide® is indicated for the following uses: Soft-tissue augmentation; localized gingival augmentation to increase keratinized tissue around teeth and implants; Alveolar ridge reconstruction for prosthetic treatment; and recession defects for root coverage.

Geistlich Mucograft® is indicated for the following uses: Covering of implants placed in immediate or delayed extraction sockets, localized gingival augmentation to increase keratinized tissue (KT) around teeth and implants, alveolar ridge reconstruction for prosthetic treatment, recession defects for root coverage.

Warnings:

As Geistlich Fibro-Gide® and Geistlich Mucograft® are collagen products, allergic reactions may not be totally excluded. Possible complications which may occur with any surgery include swelling at the surgical site, flap sloughing, bleeding, dehiscence, hematoma, increased sensitivity and pain, redness and local inflammation.
