

Geistlich Derma-Gide® RCT Highlights in Diabetic Foot Ulcers

Use of a Purified Reconstituted Bilayer Matrix (PRBM) in the Management of Chronic Diabetic Foot Ulcers Improves Patient Outcomes vs Standard of Care – Results of a Prospective Randomized Controlled Multi-Center Clinical Trial

David G. Armstrong, DPM, MD, PhD; Dennis P. Orgill, MD, PhD; Robert D. Galiano, MD; Paul M. Glat, MD; Jarrod P. Kaufman, MD; Marissa J. Carter, MA, PhD; Lawrence A. DiDomenico, DPM, FACFAS; Charles M. Zelen, DPM, FACFAS¹

Geistlich Derma-Gide® is a clinically proven, cost effective solution for hard to heal chronic wounds. In a 40 patient, prospective, randomized controlled trial, Geistlich Derma-Gide® demonstrated the following outcomes as compared to Standard of Care (SOC – Fibracol®):

Clinical Highlights

Expect powerful clinical results exactly like no other

85–94%

Healing rates at 12 weeks

~3x

More patients healed by 12 weeks vs. SOC

Complete closure in

~1/2

off the time of SOC alone

96.4%

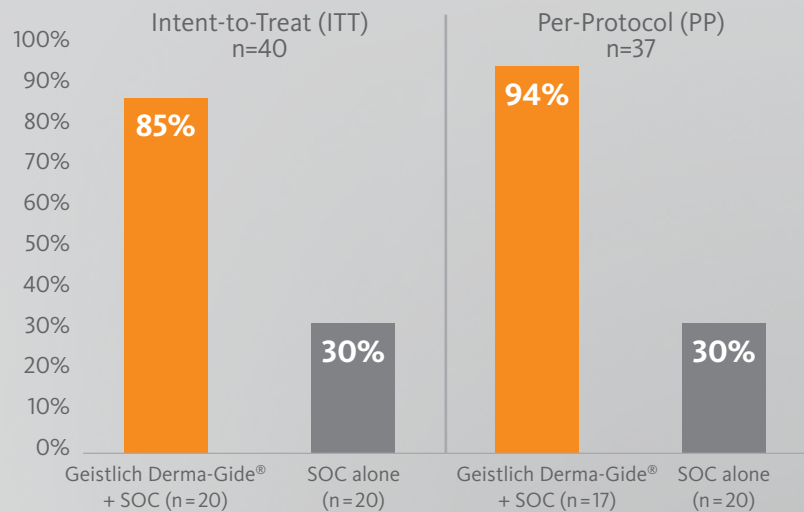

Percent Wound Area Reduction

0

Product related adverse events

Results of Prospective Randomized Controlled Multi-Center Clinical Trial

Complete Wound Closure at 12 Weeks

ITT: P = 0.0004, PP: P = 0.00008

Average Time to Closure

P = 0.002

Geistlich Derma-Gide® + SOC

SOC Alone

EXACTLY
like no other.

Clinical Highlights

Expect health economic results exactly like no other

Geistlich Derma-Gide® is shown to have lower published costs of closure when comparing to similar published prospective DFU RCTs at 12 weeks.

21% – 85%

Less Than Other Commercially Available Advanced Skin Substitutes

Economic Efficiency

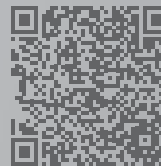

of Geistlich Derma-Gide® is due to...

- ✓ High Efficacy
- ✓ Comprehensive Array of Sizes
- ✓ Competitive Costs

Expect powerful clinical results exactly like no other

FDA-cleared | 2nd generation xenograft | bi-layered | featuring 4-Dimensions of product design
It's time to DISRUPT and RAISE your EXPECTATIONS with Geistlich Derma-Gide®.
